INTERACTIVE STATIONS

NETBOARD PORTABLE is an all-in-one solution consisting in an interactive projector assembled on a proprietary mount designed to allow the use on the floor, on a table or on the wall. It can also integrate a microcomputer, laptop or tablet. Students can interact intuitively with educational contents in multiple surfaces, developing their motor, cognitive and social skills.

(AIO)

(LAPTOP)

MOBILITY

It allows changing the room configuration with minimal effort, with no need to recalibrate. It has as a trolley as accessory [NBPORT TRL] for transportation between rooms.

INTEGRATION

It can incorporate a shelf for laptop placement or integrate a micro-PC with the power connection made through just one cable.

INTERACTIVITY

Turns any flat surface in an interactive canvas. For a clear projection a white mat [NBPORT MT] is available. Includes automatic calibration and two interactive pens, for multiple users.

SAFETY AND STURDINESS

Its robust structure with no edges ensures stability to prevent falling. The mounting system for tables allows the adjustment to different table tops thicknesses.
