

# Kano PC

Anyone can empower  
the next generation

## Build and code a computer

Students follow the book, connect the battery, speaker, and keyboard, then bring their computer to life. With a guided onscreen adventure, making art, games, and music, they learn about code, binary, pixels, processors, sound, and more.

## Fix Packs

We make it easy. Using the Kano Fix Packs, teachers and students are able to fix problems within minutes. No sending the computer off, or waiting weeks for repairs. Kano also offers Extended Warranty programs.

## Anyone can teach computer science

Even if you're not a computer science teacher. Students go from beginner to master with simple, step-by-step lessons, that offer real learning outcomes. Kano delivers standard-aligned Curriculum and Professional Development, at a competitive price point.

**Creations shared**

**Lines of code**  
73,531,969

## Windows 10

Kano PC has everything the classroom needs: Office Suite, Minecraft EDU Edition, and our unique creative apps: Kano Code, How Computers Work and Make Art – enabling students to understand their computer, and shape the world with the power of Windows.

With a Windows 10 device and Microsoft 365 education (sold separately) you'll have everything you need to simplify set-up and management, make the most of class time, and create engaged and inclusive classrooms.
